

Back in June, 2015 I got news that my son, " " had successfully completed all the classes required for his Ph.D in Physics. All he has left is his thesis. He is in grad school at Cal Tech in River Side California. Anyway we have talked about some of the stuff he has learned, such as; electricity, magnetism, rotating tops, orbiting planets and quantum mechanics, as well as the "Law of physics", including gravity as one of the topics. Gravity, does not only govern the Laws that cause an apple to fall from a tree. Gravity is how the moon orbits our planet and has an effect through out our solar system, and the cosmos. Voyager 1 and Voyager 2 launched in the late 1970's were un-manned space craft. Once out of the earth's atmosphere they traveled and orbited several planets in our solar system, sending back data and photos like we have never seen before. But these space craft were not loaded down with fuel. They used what are called gravitation belts. It used the gravity around our moon to sling shot it to it's first destination, I believe it was Mars. Then it used Mars's gravity to sling shot it the next planet, and so on, until it reached Pluto then it went on into outer space. Where am I goin with this? Well, these Laws of gravity, are actually the Laws in the Cosmos that God put in place. God gave us the ability to figure some of these things out for many reasons. Anyway, these Laws in the Cosmos obey God's commands. It's there natural course and natural purpose. What happens in the Cosmos, has an effect here on earth. We, on the other hand do not follow God's commands. If we did, we would be in perfect order in the way of our solar system, gravity and the way the cosmos works. The planets in our solar system orbit the sun, and the moon or moons orbit the planets in such a way that we can mathematically calculate with perfect timing. (It's like a giant perfect clock.)

We can accurately predict eclipses of all kinds, including blood moon's etc. Human beings have had this ~~ability~~ mathematical ability for a long time. I believe for thousands of years. (Based on ancient calendars recorded in history.) Anyway we can see with our own eyes the perfection and perfect timing of God. If we could follow his commands perfectly we would not have fallen into sin. But sadly because of our flesh everyone of us fall short. I believe, that when we are born again, this re-birth is a new creation, just as the Bible says. This new creation is given this extremely gift, called the, "Holy Spirit". And I believe if we stay in constant prayer for long periods of time, that even our dreams are filled with praise and worship God. When we are in this zone, by the natural Laws of God, we truly desire the things of God, such as; Truth, honest

kindness, gentleness, love, peace, joy, happiness, love, worship and praising the Lord. By maintaining continuity with the Lord in prayer, we begin to fill this tug at our heart, or this gentle whisper in the ear of our heart, that encourages us to do the right thing. It's so cool when we make the right choice, it feels like we are in sequence, in timing, in the natural Laws of God's gravitational, pulling us towards Him. When we make the wrong choice, it feels like I fell out of a tree, like an apple, and it hurts. Because I hurt the one that died for my sins. I like making the right choice. When I listen and obey, I am in perfect timing and in the true natural Laws God designed us to be in. Though, I know that the flesh will prove to be stubborn preventing me from being perfect in God's eyes, I can't help but feel the desire to do what's right. I pray the Holy Spirit will keep the calluses from building up on my heart, so I will be more sensitive to feeling His tug and hearing His whisper.

May the Holy Spirit help me to always make the Right choice. Through the Grace of God, may I one day, be in perfect harmony with God.

Thank You heavenly Father for Your Mighty Son, "Jesus Christ," and for the, "Holy Spirit," living inside of me. Thank You for Blessing the world with abundant Life, and rescuing us from death. Amen

P.S. Thank You Lord, for Blessing my Son with such great intelligence. May he use it, on the ways that honor You Lord. Amen

From Your friend on Christ Jesus

I hope this was written in a way that honors God and encourages others to stay in constant prayer. Prayer is like a gravitational belt pulling us closer and closer to God. Remember, God is so big it is on the natural laws of gravity for us to be pulled towards Him, not away from Him. All we have to do, is listen and obey. Look at the Cosmos, it listens and obeys, and is in perfect Harmony with God. And one day we will be too. May God Bless You Richly. Amen.

There are the natural laws of the flesh 
And there are the natural laws of the Spirit

Listen for His whisper, pay attention to His tug.

I hope this is something you would like to publish. If so feel free to do so. Sincerely,

If you do publish it could you please send me a copy.
Thank You & God Bless You.
